Papercut – Print Deploy Setup (MacOS)

Print deploy automates the process of installing printer drivers and print queues.

To get started:

- Ensure you are connected to the BCL network (wired or WiFi)
- Open a web browser and navigate to:
  http://papercut2.bcl.net.au:9191/print-deploy/client-setup/macos.html
- Click the **Download** button and save the file. (Don't change the name of the installer).
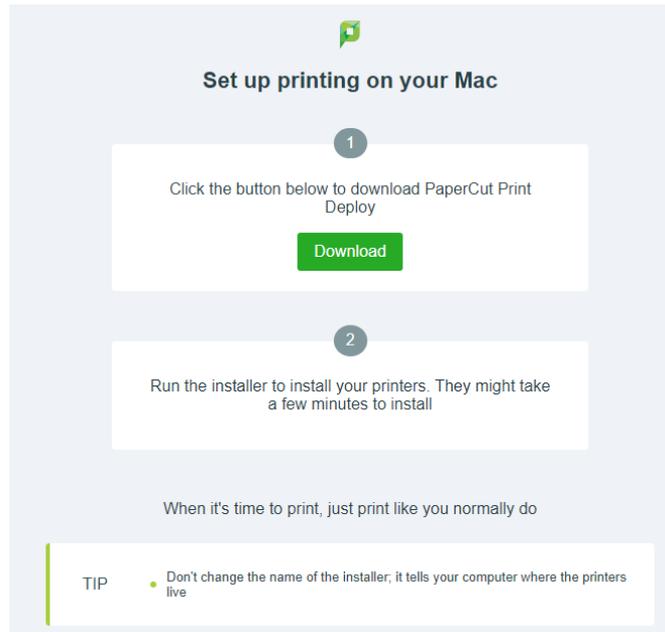

- Once the file has downloaded open it and then open the **Print Deploy.pkg** file. Follow the installation prompts.
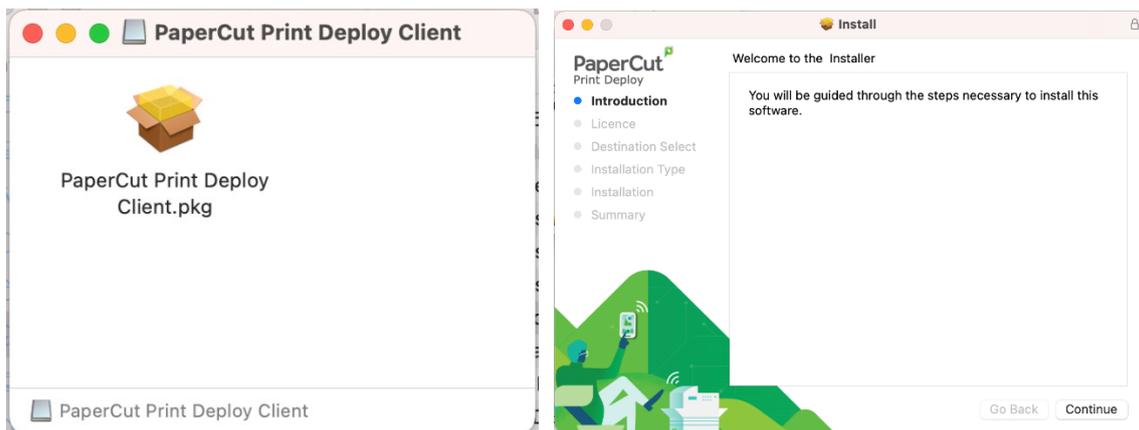

- Enter your computer password when prompted and click **Install** Software. Then click **OK** to allow Print Deploy to manage your printers.

Installer is trying to install new software.

Enter your password to allow this.

Username: Anthony Aparo

Password:

Cancel   Install Software

"Installer.app" would like to administer your computer. Administration can include modifying passwords, networking and system settings.

Don't Allow   OK
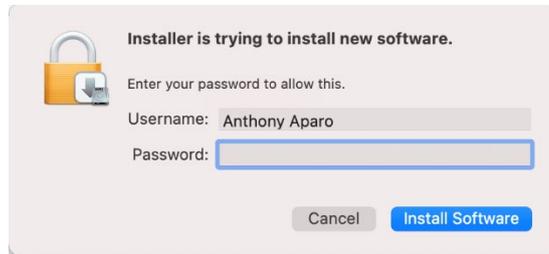

- Setup will complete, Print Deploy will automatically start installing the required printers for your account and you can start printing.

We recommend removing printers that have been previously configured, to do this:

- Click the **Apple** icon in the top left of the screen and open **System preferences**
- Open **Printers and Scanners**

 Finder File Edit View
